GitHub: github.com/Webprovale LinkedIn Profile: <https://www.linkedin.com/in/webprowale-akinwale/>

PROFESSIONAL SUMMARY

Full stack developer with 5+ years of experience; building reliable and scalable web solutions. Specializes in backend systems using Node.js (Nest JS/Express) and PHP (Laravel/CodeIgniter), along with frontend interfaces in React and Next.js. Track record includes improving system speed, streamlining deployments, and contributing to products used in sectors like e-commerce, ride –hailing, and B2B services. If you’re looking to build products that perform well and evolve easily, let’s build something that lasts.

EDUCATION

B.E Mechanical Engineering

2016- 2021

Federal University of Oye-Ekiti

CORE SKILLS

- **Backend:** Node.js, NestJS, Express.js, PHP Laravel, CodeIgniter.
- **Frontend:** React, Next.js, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Bootstrap.
- **Databases:** MySQL, Query Optimization, Data Modeling.
- **API Design:** RESTful APIs, GraphQL, Shopify Integrations
- **DevOps/Tools:** Docker, Jenkins, Git, GitHub, AWS (EC2, S3), Postman.
- **Practices:** Test-Driven Development (TDD), Agile, CI/CD, Code Reviews.

SELECTED PROJECTS & IMPACTS

- Built an Ai-powered voice productivity tool called Sonicnata that uses whisper(for transcription), GPT and Gemini (For contextual summarization), and Supabase for authentication and storage. For More projects view, visit <https://webprowale.netlify.app/>
- Built a React + Laravel that improved client workflow efficiency by 40%.

WORK EXPERIENCE

Backend Engineer

December 2024- Present

Konvas AI

- Built and maintained REST APIs using PHP (Laravel), processing 10k+ daily requests

- Optimized MySQL queries to speed up reporting tools and data-heavy endpoints
- Integrated Shopify storefronts via GraphQL to support client-side personalization
- Built Shopify app for the company and used PHP (codeigniter).

Key Achievement

- Reduced API latency by 25% improving platform responsiveness
- Decreased report generation time from 8 seconds to 2 seconds
- Contributed to a 15% increase in checkout conversions through smart upsell logic.

Senior Frontend Developer

August 2023- August 2024

GoGoRides- Ride-Hiling Platform / Consumer Tech

- Rebuilt the main frontend using React and Next.js
- Led frontend performance improvements through lazy loading and modular design.
- Set up and maintained CI/CD pipelines using Jenkins and GitHub Actions

Key Achievements

- Improved page load speed by 30%, enhancing mobile experience
- Cut deployment time by 40% through CI/CD automation
- Reduced frontend bug reports by 35% within the first 3 months post-deployments

Freelance Software Developer

May 2023- November 2024

Remote, Part-Time

- Completed multiple clients projects across e-commerce, admin tools, and Saas MVPs
- Created micro services with NestJS and Express
- Developed dashboards using React + Laravel.

Software Developer

March 2022- November 2023

Intellic Solutions

- RE-engineered backend systems with Laravel for performance
- Collaborated on CRM module development across sales, support, and analytics.
- Wrote reusable backend components for feature scalability
- Mentored younger developers how to code and build software for clients.

Key achievement

- Developed CRM modules adopted by 100+ enterprise clients
